

Supper and Sips

We Deserve Arrays

Elevator Pitch

Supper and Sips

Description - An app that will help you randomly search for dinner and drink recipes and save your favorites.

Motivation - For that date night, dinner party or just somebody that has run out of dinner ideas or for the family and/or drinks for game night.

User Story

AS someone who enjoys cooking and making drinks

I WANT the ability to have someone else help me choose my menu when I'm out of ideas

SO THAT my guests and/or family will be impressed with my ingenuity

Technologies used

- Bulma, Font Awesome, CSS, Javascript, HTML

Breakdown of tasks and roles

- Jose, Anira, Amrinderjeet - Primary web developers and QA
- Travis - Presentation, QA, and secondary developer

Challenges

- Api Limits, displaying local storage, randomizing recipes, Github branches/conflicts

Successes

- Learning Burma, better understanding of API calls/limits

A man in a dark suit and tie is shown from the chest up, pointing his right index finger towards the word "DEMO". The word is rendered in large, white, 3D block letters with a slight glow. The background is a warm, golden-brown color with a bokeh effect. There are several glowing gear icons and a trail of small, sparkling particles that follow the path of the finger and the word "DEMO".

DEMO

Potential for Future Development

- Add the ability to choose the number of courses you'd like, and the type of course, i.e. entree, salad, dessert, etc.
- Add the ability to define the random drink based on the entree choice, with an api that specializes in pairings.
- Print the recipe to pdf or to your printer to save
- Open the modal to a new page that will display a video
- Options for vegan and non-alcoholic drinks
